STEADY DOWN
(Taylor Carson)

Stars and city lights, just like you and I
Come alive at night
Tattoos and scars, just like a broken heart
Not so easily undone

Well, I will pick you up
When you're feeling low like you've lost control
Just take my hand and we'll go

Close your eyes, have faith in me
I led you to a raging sea and let you go just to hear you call my name
You said "Oh boy, now it's your turn"
"Time for your lesson learned" well I've learned the hard way

Like an angel you sing

Well, I will pick you up
When you're feeling low like you've lost control
Just take my hand and we'll go

The bridges we are building now
There's no need to burn them down
Your shine it surely ain't out
In fact you light this whole damn town

So steady down

Well, I will pick you up
When you're feeling low like you've lost control
Just take my hand and we'll go
